# INTERACTIVE DIGITAL PORTFOLIO USING FRONT END DEVELOPMENT

Edit with WPS Office

## 1 Problem statement

Many beginners and professionals struggle to present their skills, projects, and achievements in clean and attractive way. Without a well-structured portfolio. It became difficult to showcase expertise to recruiters or clients.

0

## 2 Project overview

This is a personal portfolio website that highlights technical skills, education, projects, and contact details in a user-friendly design. It is responsive and designed to create a professional online presence.

④

### *3. End user*

*Job seekers / students - to showcase skills and projects.*

*Recruiters / employers - easily view candidates capabilities.*

*Freelancers / clients - to present work samples and contact info.*

## *4.Tools and technologies*

*HTML5 – for structure.*

*CSS3 – for design and layout.*

*JavaScript – for interactivity and smooth navigation.*

## *5 Portfolio design and layout*

*Simple, clean, and professional design.*

*Sections like Home, Education, skills, projects, and Contact arranged horizontally.*

*Smooth navigation with a user-friendly.*

## *6Features and functionality*

- *Navigation bar with quick links to section.*
- *Education section – academic background.*
- *Skills section- highlights tools and technologies known.*
- *Projects section- showcase completed work.*
- *Contact form / details- for communication.*
- *Responsive layout for different screen sizes.*

## 7. Result and screenshot
